CONTENTS

Vol.6, No.2, 2021

A. Boulkhemair, A. Chakib, A. Sadik (pp.73-88)

Geometrical variations of a state-constrained functional on star-shaped domains

S.M. Rasheed, A. Nachaoui, M.F. Hama, A.K. Jabbar (pp.89-105)

Regularized and preconditioned conjugate gradient like-methods methods for polynomial approximation of an inverse Cauchy problem

A.N. Belyaev, A.A. Golozin, S.A. Shevchenko (pp.106-112)

The effect of elastic strain of a three-axis gyrostabilized platform on the orientation accuracy of the sensitivity axes of the integrating gyroscopes: experimental evaluation

A.J. Alidamat, A.I. Al-Omari (pp.113-127)

The extended length biased two parameters Mirra distribution with an application to engineering data

J. Manafian, N. Allahverdiyeva (pp.128-161)

An analytical analysis to solve the fractional differential equations

A. Nachaoui, M. Nachaoui, B. Gasimov (pp.162-173)

Parallel numerical computation of an analytical method for solving an inverse problem

T. Mamiyeva (pp.174-181)

On Cauchy and boundary value problems for the third-order discrete-multiplicative derivative equation

V. Sultanova (pp.182-188)

Construction of the adjoint problem to the discrete problems for the second order equation
