Volume 6 No.3 2021

CONTENTS

Vol.6, No.3, 2021

A. Nachaoui, H.W. Salih (pp.191-205)

An analytical solution for the nonlinear inverse Cauchy problem

A. Belafhal, H. Benzehoua, T. Usman (pp.206-217)

Certain integral transforms and their application to generate new laser waves: Exton-Gaussian beams

H. Guliyev, H. Tagiev (pp.218-226)

On the determination of the coefficients of the second-order hyperbolic equation with a nonlocal condition

M. Shahriari, A. Aliyev (pp.227-237)

Inverse Sturm-Liouville problems using finite number of transmission conditions

R. Aghayan (pp.238-251)

More about classical visual groups

G. Yakub, N.S. Ibrahimov, M. Zengin (pp.252-265)

Optimal control problem for the stationary quasi-optics equation with a special gradient term

R.F. Efendiev, H.D. Orudzhev, S.J. Bahlulzade (pp.266-277)

Spectral analysis of the discontinuous Sturm-Liouville operator with almost-periodic potentials

D. Dafik, F. Susanto, R. Alfarisi, B.J. Septory, I.H. Agustin, M. Venkatachalam (pp.278-291)

On rainbow antimagic coloring of graphs

N.U. Khan, M.I. Khan, O. Khan (pp.292-301)

Certain finite integrals involving generalized Wright function

A. Guliyev (pp.302-308)

On a fundamental solution of one linear ordinary differential equation with fractional order derivative

S. Yacini, Ch. Allalou, Kh. Hilal, A. Kassidi (pp.309-321)

Weak solutions to Kirchhoff type problems via topological degree

Sh.A. Omar, R.N. Othman, N.F. Ahmed, H.S. Ezat, Z.A. Kakarash (pp.322-334)

Effective data parallel optimization for quantifying the mathematical model of subsystems in multivariable systems
