CONTENTS
Vol.7, No.1, 2022

S.Ya. Serovajsky, M. Sigalovsky, A. Azimov (pp.5-15)

Non-smooth optimization methods in the geometric inverse gravimetry problem

H.K. Nigam, M. Mursaleen, Saroj Yadav (pp.16-29)

Degree of convergence of derived Fourier series in Besov spaces

H.F. Guliyev, I.M. Askerov (pp.30-37)

On a determination of the coefficients of the second order hyperbolic equation with discontinuous solution

R. Shamsi, J. Manafian, S. Esmaeili (pp.38-43)

Ranking extreme efficient decision making units in stochastic DEA

A.Kh. Khanmammadov, A.F. Mamedova (pp.44-47)

The Riemann function of the Cauchy problem for a second-order hyperbolic equation with a periodic coefficient

S.K. Al-Asadi, A.A. Omran, F.A. Al-Maamori (pp.48-54)

Some properties of mobius function graph $\mathcal{M}^{(I)}$

H.R. Baanoon, M.F. Hamid (pp.55-59)

Fully small stable S-systems

A. Mahanta, Idweep J. Gogoi, A. Bharali (pp.60-68)

A note on Zagreb spectra and Zagreb Laplacian spectra of two weighted corona networks

N. Bora, B. Chutia, R. Moran, A. Pegu (pp.69-75)

A note on bifurcation points of two-parameter matrix eigenvalue problems

K.V. Vidyasagar (pp.76-84)

Certain geometric properties of ℓ -hypergeometric function

C.F. Mammadov, A.H. Huseynov, Y.M. Hasanova, M.R. Salimova (pp.85-92)

Algorithmic and mathematical support for topology research of the corporative networks

S.Z. Taj, S.M. Rizwan (pp.93-103)

Reliability analysis of a 3-unit parallel system with single maintenance facility
