

Volume 7 No.3 2022

**ADVANCED
MATHEMATICAL
MODELS &
APPLICATIONS**

ISSN 2519-4445

CONTENTS

Vol.7, No.3, 2022

H. Jafari, S. Manjarekar (pp.253-263)

Modification on the new general integral transform

A. Salihu, H. Snopce, A. Luma, J. Ajdari (pp.264-274)

Optimization of Dodgson's condensation method for rectangular determinant calculations

C. Dhivya, P.M. Krishna (pp.275-291)

Galerkin method with B-splines for coupled system of nonlinear boundary value problems

E.N. Mahmudov, B. Güloğlu, D. Mastalieva (pp.292-305)

An abstract model of economic dynamics for second order discrete inclusions

F. Aboud, I.Th. Jameel, A.F. Hasan, B.Kh. Mostafa, A. Nachaoui (pp.306-322)

Polynomial approximation of an inverse Cauchy problem for Helmholtz type equations

M. Saini, A. Kumar, V.S. Maan (pp.323-332)

Mathematical modeling and availability optimization of embedded life critical systems

I.A. Ahmad, A.R. Mugdadi (pp.333-338)

On convergence rates of nonparametric density functionals estimates

V. Gritsyuk, I. Nevliudov, M. Omarov, O. Tsymbal, M. Zablodskiy, V. Pavlysh (pp.339-350)

Numerical simulation of processes in auger converter as part of mobile robotic platform for 3D printing

A.B. Aliev, Y.M. Farhadova (pp.351-360)

Existence of a solution to the nonlinear bridge problem with a time-varying delay

BOOK REVIEWS

Raissa Moura Ferreira (pp.361-363)

Sustainable ethics in data processing decisions in the context of innovation

by D. Cabella, D. Monte-Serrat

A. Nachaoui, L. Agamalieva (pp.364-365)

Discrete Mathematics by Rza Bashirov
