

Volume 8 No.1 2023

**ADVANCED
MATHEMATICAL
MODELS &
APPLICATIONS**

ISSN 2519-4445

CONTENTS
Vol.8, No.1, 2023

M. Basto, T. Abreu, R. Gonçalves, J.M. Pereira (pp.5-13)

Example-based overview to statistical inference

Kh. E. Abbasova (pp.14-18)

The Schrodinger operator with growing potential

M.C. Ramírez, J.E. Nápoles Valdes, A. Figueredo López, N. Allahverdiyeva (pp.19-33)

Algebraic structure in certain generalized fuzzy sets

A.S. Alhasanat (pp.34-44)

On the minimal speed determinacy of traveling waves to a three-species competition model

S.A. Bandar, E.A. Hussein, H.M. Yousof, A.Z. Afify, A.D. Abdellatif (pp.45-64)

A novel extension of the reduced-Kies family: Properties, inference, and applications to reliability engineering data

C. Riahi, I. Agmour, Y. El Foutayeni (pp.65-82)

Impact of temperature on profit estimation of two Fishermen exploiting three competing species using Markov chain

L. Fatullayeva, N. Fomina, N. Mammadova (pp.83-91)

Calculation of critical force during bending of a rectangular arch under pressure

M. Nadeem, W.A. Khan, K.A.H. Alzobidi, C. S. Ryoo, M. Shadab, R. Ali (pp.92-107)

Certain properties on Bell-based Apostol-type Frobenius-Genocchi polynomials and its applications

M. Mutallimov, U. Rasulova, N. Huseynova (pp.108-115)

The identification problem in the gas-lift process modeled by the system of differential equations with delayed arguments (Discrete case)

K. Sharma, D. Dumka, L. Rathore, M.K. Sharma, L. Narayan Mishra (pp.116-124)

Error of approximation of function in Lipschitz class via almost $(N; p_k; q_k)$ -means
