

Volume 8, No.3, 2023

**ADVANCED
MATHEMATICAL
MODELS &
APPLICATIONS**

ISSN 2519-4445

CONTENTS

Vol.8, No.3, 2023

D. Monte-Serrat, E. Ruiz, C. Cattani (pp.437-451)

New universal labeling strategy for meaning representation in NLP

N. Zidan, A. Redwan, H. Adel-Hameed, T. El-Shahat (452-463)

Quantum Fisher Information and quantum discord in the two-qubit spin chain with Dzyaloshinskii-Moriya interaction

Y.T. Mangongo, J.D.K. Bukweli, J.D.B. Kampempe, J.M.W. Munganga (pp.464-484)

Global stability analysis of transmission dynamics of a model of Malaria with fuzzy mosquito populations

A. Salihu, H. Snopce, A. Luma, J. Ajdari (pp.485-501)

Modified Chios-like method for rectangular determinant calculations

D. Pervukhin, H. Davardoost, D. Kotov, Y. Ilyukhina, K. Hasanov (pp.502-528)

A sustainable development goals-based mathematical model for selecting oil and gas investment projects under uncertainty and limited resources

L. Fatullayeva, N. Fomina, N. Mammadova (pp.529-535)

The problem of stability of a rectangular arch with rigid pinching of both ends

S. Meftah, F. Yazid, F.S. Djeradi (pp.536-547)

General decay of solution for a viscoelastic-type transmission problem with varying decay

I. Nevliudov, M. Omarov, Y. Romashov, V. Muradova, M. Vzesnevsky (pp.548-564)

One approach to find optimal controls for discrete dynamic systems with numerical methods application

Solimun, N.W.S. Wardhani, A.A.R. Fernandes, D.P. Kartikasari, B. Hutahayan (pp.565-589)

Cluster analysis with various combination of distance and linkage for modeling dummy variable path analysis
