CONTENTS

Vol.9, No.2, 2024

C.M. Khalique, O.D. Adeyemo, M.S. Monashane (pp.147-172)

Exact solutions, wave dynamics and conservation laws of a generalized geophysical Korteweg de Vries equation in ocean physics using Lie symmetry analysis

A. Ashyralyev, M. Ashyralyyeva, O. Batyrova (pp.173-192)

A note on the telegraph type differential equation with time involution

S.M. Narsale, R.K. Lodhi, H. Jafari (pp.193-204)

A numerical study for non-linear multi-term fractional order differential equations

S. Serovajsky, O. Turar, T. Imankulov, A. Azimov (pp.205-222)

Mathematical modeling of epidemic propagation with vaccination

M. Hasanov, S. Piriev, K. Hacıyeva, T. Rasullu, E. Payizov (pp.223-233)

Mathematical model of fatigue degradation of cylindrical piezo element of linear micro piezo motor

A. Zarour, I.M. Batiha, A. Ouannas, M.N. Lamy, I. Rezzoug (pp.234-245)

Synchronizing chaos: Exploring attractive sets in a novel 4D hyperchaotic Lorenz model

F.A. Israfilov (pp.246-251)

Boundary value problem with a spectral parameter

J.L. Bodibe, C.M. Khalique (pp.252-266)

Lie group analysis and conserved vectors of a generalized (3+1)-dimensional Kadomtsev-Petviashvili Benjamin-Bona-Mahony equation with power law nonlinearity

M. El Yahyaoui, S. Amine, R. Bouajaji (pp.267-285)

Stability and control analysis of an unemployment model incorporating integration programs effect

C.E. Musayev, M.A. Rustamova, G.A. Mammadova (pp.286-295)

Motion of a cylindrical net with a mass at the end

S. Bidah, O. Zakary, M. Rachik (pp.296-315)

Optimizing opinion influence in multi-zone context: Strategies in agree-disagree models

M. Boutiba, S. Baghli-Bendimerad, N. El Houda Bouzara-Sahraoui (pp.316-328)

Numerical solution by finite element method for time Caputo-Fabrizio fractional partial diffusion equation
