Volume 9, No.3, 2024

CONTENTS

Vol.9, No.3, 2024

A.T. Kussainova, S.A. Boranbaev, A.L. Karchevsky (pp.329-341)

Optimization approach for solving the continuation problem in frequency domain

F. Kamalov, A.F. Atiya (pp.342-359)

Optimal sampling ratio for imbalanced data

S.O. Edeki, G.O. Akinlabi, A.F. Adedotun, C.M. Khalique (pp.360-369)

Mathematical modeling and analysis of bank capital adequacy dynamics

Sh. Gholamtabar, S.H. Nasser, A. Arzhang (pp.370-386)

An improving approach for interval and fuzzy number linear programming problems

R.G. Thunibat, A.N. Akour, E.K. Jaradat, O.K. Jaradat (pp.387-400)

Demonstrating non-linear RLC circuit equation by involving fractional Adomian decomposition method by Caputo definition

P.V.L. Em (pp.401-407)

Comparison of synchronization speed of ring networks of reaction-diffusion equations of Fitzhugh-Nagumo type with unidirectional and bidirectional coupling

M.A. Ginting, Y. Dani (pp.408-414)

Numerical simulation of wave damping induced by vegetation on solitary wave run-up with momentum conservative scheme

M.Z. Aldrabseh, M.T. Ismail, A.I. Al-Omari (pp.415-430)

Double except extreme ranked set sampling for estimating population mean

R.F. Efendiev, M.R. Sharifli (pp.431-436)

Spectral properties of an impulsive Sturm-Liouville operator with complex periodic coefficients

S. Hachoum, M. Riouali, I. Elberrai, K. Adnaoui, N. Ouldkhouia (pp.437-453)

Mathematical modeling and optimal control of Wheat Stripe Rust (*Yellow Rust*) disease

S. Essarrout, S. Raghay, Z. Mahani (pp.454-474)

Well-posedness and convergence analysis of the multi-level Monte Carlo method for a system of PDEs with random coefficients modeling drug transport in tumors

M. Abotaleb (pp.475-524)

Proving optimal model selection and zero coefficient cases in time series forecasting with the generalized least deviation algorithm
