

Volume 8 No.2 2023

**ADVANCED
MATHEMATICAL
MODELS &
APPLICATIONS**

ISSN 2519-4445

CONTENTS
Vol.8, No.2, 2023

L. Zhang, S. Kvizera, C.M. Khalique (pp.125-139)

A study of a new generalized Burgers' equation: Symmetry solutions and conservation laws

G.T. Gellow, J.M.W. Munganga, H. Jafari (pp.140-156)

Analysis of a ten compartmental mathematical model of malaria transmission

F.R. Lopez, O. Rubio (pp.157-175)

A new fractional curvature of curves using the Caputo's fractional derivative

S. Serovajsky, O. Turar, T. Imankulov, A. Azimov (pp.176-184)

Stabilizing the system in the problem of epidemic spread limited time of immunization

K.H. Sadeghi, A. Razmini, A. Marashian (pp.185-198)

Efficient identification algorithm for controlling multivariable tumor models: Gradient-based and Two-Stage method

C.L. Ejikeme, R.F. Agbebaku, M.B. Okofu, M.I. Atuokwu, C.O. Okoye (pp.199-222)

Homotopy analysis method for fractional derivative model of energy generation in the human cell

C. Hedadji, N. Arrar, N. Djellab (pp.223-240)

Approximation of M/M/1 queue with interruption service, retrials and orbital search

S. Salati, M. Matinfar, H. Jafari (pp.241-252)

A numerical approach for solving Bagley-Torvik and fractional oscillation equations

A. Benzian (pp.253-270)

Exponential stability of solutions for a system of variable coefficients viscoelastic wave equations with past history and logarithmic nonlinearities

J. Kholbekov (pp.271-283)

Boundary value problem for a parabolic-hyperbolic equation loaded by the fractional order integral operator
