CONTENTS

Vol.4, No.2, 2022

K. Vishwanathan (pp.69-80)

Au₅₃: A strongest super triple-state degrees of degeneracy in metallic nanoclusters, Au₅₁₋₅₄ (C₁)

E.P. Popov, O.A. Aliyev, E. Demir, D. Neov, A.S. Doroshkevich, M.N. Mirzayev, P. Horodek, T.T. Thabethe, G.T. Imanova, H.V. Akhundzada, A.A. Sidorin, F. Mamedov

Kinetics of thermo heterogeneous process under non-isothermal terms on the titanium carbide: a study on the different irradiation conditions

E.M. Gojayev (pp.87-93)

The features of the electronic structure of lanthanides

N.A. Aliyeva, Y.I. Aliyev, A.S. Abiyev (pp.94-99)

Study of thermal properties of Cu₄Se_{1.5}Te_{0.5} and Cu₄Te_{1.5}Se_{0.5} compounds by differential thermal analysis

S.S. Hasanova (pp.100-105)

Synthesis, physico-chemical analysis and crystal structure of 3,5-dinitrobenzoate of uranium U(VI)

R.F. Rzayev (pp.106-110)

Influence of neutron flux on the crystal structure of Y₂O₃ nanoparticles

A. Dashdemirov, G. Sharifov (pp.111-121)

Secondary school steam education: case study research and problems
